DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 10 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 10 and 12 is lack of antecedent basis respectively for: "the name of the liquid" and "the name of the volatile solution".

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1762

4. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (paragraphs 0003 and 0004) in view of Yoshizawa et al.

The admitted prior art discloses in the fabrication of semiconductor integrated circuits, a method for generating a dummy dispense of liquid. A time at which a substrate is processed, a time at which liquid is dispensed, a time at which the substrate is processed is a move-in time of the substrate, the time at which the liquid is dispensed comprises a last time at which the liquid is dispensed; and a dummy dispense signal are all disclosed. A photoresist solution that is volatile is also disclosed.

There is not disclosed by the admitted prior art:

- recording times for substrate processing and liquid dispensing;
- comparing the time at which the substrate is processed and the time at which the liquid is dispensed to determine whether a dummy dispense is required; and,
- recording a recipe for dispensing the liquid and the name of the liquid.

Yoshizawa et al discloses recording times for processing in a manufacturing environment and comparing times to determine if a procedure must be altered (col 3, lines 13-58). Yoshizawa et al also discloses recording a "recipe" in a manufacturing

environment (col 2, lines 9-28). Film formation for photolithography is disclosed as one type of manufacturing environment (col 1, lines 34-35).

It would have been obvious to one with ordinary skill in the art to include recording times for substrate processing and liquid dispensing, then comparing the time at which the substrate is processed and the time at which the liquid is dispensed to determine whether a dummy dispense is required because Yoshizawa et al teaches collection and monitor data for a successful manufacturing environment (col 2, lines 58-68).

It would have been obvious to one with ordinary skill in the art to include recording a recipe for dispensing the liquid and the name of the liquid because Yoshizawa et al teaches conditions utilized in the manufacturing environment as important (col 2, lines 9-28).

Response to Arguments

5. Applicant's arguments filed 1-2-07 have been fully considered but they are not persuasive.

The generation of a dummy dispense signal is disclosed in the admitted prior art. Regarding reasonable expectation of results, the '561 patent discusses manufacturing efficiencies in general, which along with a specific example the type of manufacturing

environment of the admitted prior art would lead one with ordinary skill in the art to be reasonable and effective.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
